Who is SENCA

 Southeast Nebraska Community Action Partnership, Inc. (SENCA) is a private non-profit 501 (c) 3 corporation incorporated on May 2, 1966 under the provisions of the Economic Opportunity Act of 1964.

 The agency offers a variety of programs and services specifically aimed to reduce poverty, revitalize communities and empower low-income households to become financially independent.

 Serving the Counties of: Cass, Johnson, Nemaha, Otoe, Pawnee, Richardson and Sarpy
Southeast Nebraska Community Action Partnership, Inc. (SENCA) is pleased to present to you the agency’s 2019 annual report. In this report you will find an overview of our programs as well as positive outcomes and success stories achieved by the individuals and families we serve.

The agency met 100% of the Organizational Standards as required by the U.S. Department of Health and Human Services Community Services Block Grant Act again this year. These standards establish performance goals, administrative standards and financial management requirements.

SENCA is responsible for soliciting and analyzing the concerns of low-income households within our service area. In 2019 we completed a full Community Assessment for the area. The information obtained through the Community Assessment is used to set priorities and make decisions about the overall direction, programs, and services offered by SENCA.

During 2019 new focus was placed on capacity building through developing the skills of our Management Team, agency supervisors, and emerging leaders. These staff attended multiple trainings geared toward helping them become stronger, more effective leaders. A standard leadership training tract for all agency supervisors and emerging leaders is being developed and will include some of these training sessions.

I would like to thank the Board of Directors for their support in setting policy, purpose and direction of our agency. Thanks also goes to our Head Start Policy Council, staff, numerous advisory groups and volunteers for their input, time and support. You play an essential role in assisting our agency to improve and grow.

I am looking forward to a new year and new challenges in 2020. SENCA will continue to strive to enhance our programs and services to best meet the needs of our families and communities. Enjoy reading our 2019 annual report.

Sincerely,

Vicky McNealy
Executive Director

OUR MISSION:
Investing in our neighbors through education and partnerships to improve lives and build strong communities in southeast Nebraska.
Community Economic Development

- Owner Occupied Rehab
- Rental Housing
- Weatherization

TRANSIT & MEALS
March 20, 2019 is a date that first-time homebuyer, Cindy, will always remember. It is on that day Cindy finalized the purchase of the family owned property that she had been calling home for more than a decade. "I was renting the house from my parents", shares Cindy, "When my dad’s health began to decline my parents had no choice but to put the house I was living in, plus one other house, up for sale."

Having lived in the small, rural Otoe County community all her life, Cindy knew that buying the home was something that she wanted to do even though her current financial situation was going to make getting a conventional mortgage loan almost impossible. Cindy has worked as a hair dresser in neighboring Nebraska City for more than 30 years and because she works on commission, her income has always fluctuated. To help complicate her financial situation, Cindy, a shoulder cancer survivor, is limited on the amount of time she can work at the salon, which is typically three days a week.

Knowing that she needed to start somewhere, Cindy made an appointment at the local USDA Rural Development Office. Cindy wanted to see if they might be able to help her or at least guide her in the right direction. Upon review of Cindy’s information, USDA referred her to Southeast Nebraska Community Action Partnership (SENCA). Unfortunately, Cindy was going through a life-change situation at the time and it took several years before she was able to make the connection with SENCA and apply for assistance.

In 2018 Cindy completed the application for SENCA’s Down Payment Assistance (DPA) with Rehab. Cindy was informed by Rosanna Glathar, Housing Program Manager, since she was a first-time home buyer applying for assistance she was required to complete the agency’s Homebuyer Education program. Cindy signed-up and completed the online program.

"While not everything in the program pertained to me", shared Cindy "I think Homebuyer Education is very beneficial for first-time home-buyers who are starting out at square one."

Upon meeting all of the program requirements, Cindy was approved for SENCA’s Down Payment Assistance with Rehab program.

In addition to the down payment assistance she received from SENCA, Cindy was also awarded a grant from First Down Nebraska to help meet the USDA down payment requirements of her mortgage loan. Cindy also received rehab funding, in the form of a grant, which does not have to be repaid as long as she lives in the home ten years.

As a result, this funding provided a much needed energy efficient furnace and air conditioner along with new energy efficient windows and doors for her home.
Homebuyer Education

Since 2002 this program has assisted:

- **80** first-time homebuyers purchase a home in the Counties of: Cass, Johnson, Nemaha, Otoe, Pawnee, Richardson, and Sarpy.

**FUNDING THROUGH THIS PROGRAM HAS SUPPORTED**

- **49** full-time employment opportunities generating various financial benefits of approximately $6.4 million

Homebuyer Education assists first-time homebuyers in understanding the ins-and-outs of buying and maintaining a home. Participants learn how to develop a budget, determine a down-payment, and how to work with a realtor. Credit issues, financing options, insurance/taxes, offers and closing, and home maintenance are also addressed.

Classes are offered in a classroom setting or on-line. Face-to-face classes are offered in a one day, eight-hour format or in two evening four-hour classes. A full eight hours is required to obtain a Certificate of Completion which is required by a number of lenders. Those who complete the class have a better understanding of the buying process and their responsibilities as a homeowner.

**Assuming that a minimum of 50% of the said financing is protected as a result of homebuyer education, this program has the potential of producing a 16 to 1 return on investment.**

Down Payment Assistance

Since 2005 this program has assisted:

- **80** first-time homebuyers purchase a home in the Counties of: Cass, Johnson, Nemaha, Otoe, Pawnee, Richardson, and Sarpy.

**FUNDING THROUGH THIS PROGRAM HAS SUPPORTED**

- **49** full-time employment opportunities generating various financial benefits of approximately $6.4 million

SENCA’s Down Payment Assistance program provides financial assistance to eligible, first-time home buyers to purchase a home and make improvements which ensure the health and safety of the home purchased. Down payment assistance can be provided for up to 20% of the total purchase price with a $15,000 maximum.

New homeowners own a stake in their community and re-invest funds into the local economy. Unoccupied homes become occupied adding to the population and tax base in the community. Home ownership helps local communities retain and/or increase their population and in many cases increase their current school enrollment. The condition of homes is improved increasing the wealth of home-owners and the assessed value of homes for a higher tax base.

**SENCA Homes has produced both long-term and one-time benefits resulting in a 4 to 1 return on investment.**

Homeowners own a stake in their community and re-invest funds into the local economy. Unoccupied homes become occupied adding to the population and tax base in the community. Home ownership helps local communities retain and/or increase their population and in many cases increase their current school enrollment. The condition of homes is improved increasing the wealth of home-owners and the assessed value of homes for a higher tax base.

**SENCA Homes has produced both long-term and one-time benefits resulting in a 4 to 1 return on investment.**
Radon Testing and Mitigation

SENCA implemented the Radon program in 2018 and is licensed with the State of Nebraska as a radon measurement and mitigation agency. Nebraska has a very high prevalence of radon in homes as one out of every two radon tests conducted in the state is elevated. According to EPA estimates, radon is the number one cause of lung cancer among non-smokers. In the first year of the program, eleven homes were tested, with one home receiving mitigation services. Financial assistance is available, based on a sliding fee scale, to households at or below 200% of the federal poverty line.

Assuming health insurance pays the majority of lung cancer treatment costs, the program has a potential of an estimated 6 to 1 return on investment.

Rental Housing

18 individuals secured or maintained safe, stable affordable rental units

100% of those renters received housing subsidies reducing out-of-pocket expense

100% of elderly or disabled individuals were able to remain independent and avoid moving to an assisted living facility or nursing home as a result of the SENCA Rental Housing program.

SENCA currently owns one housing complex that accommodates low-income families and one that accommodates elderly and disabled low-income individuals. The family designated complex is located in Elk Creek. The elderly and disabled complex is located in Falls City. Rent subsidies are provided by USDA Rural Development to low-income, elderly residents who meet income guidelines. Residents have access to safe, stable, and affordable housing. Affordable housing opportunities bring and/or keep residents in the area and contribute to the local economy through spending money in local businesses. Elderly and/or disabled individuals are able to maintain an independent living situation for a longer period of time postponing their need for assisted living and/or nursing home care.

Transit & Meals

5,563 rides to individuals throughout the counties of Pawnee and Richardson

14,248 meals served through Meals on Wheels and congregate meals in Johnson, Pawnee, and Richardson counties

SENCA operates two low-cost public transit systems assisting individuals in Pawnee and Richardson Counties. SENCA also operates two meal programs, one in Pawnee City (Pawnee County) and one in Tecumseh (Johnson County). These meal programs serve congregate meals to the diners and also deliver Meals on Wheels to home bound individuals. SENCA also contracts with the Colonial Acres Nursing Home in Humboldt to provide Meals on Wheels to local residents.

Individuals and communities benefit from each of these programs. They provide seniors with personal worth and improved morale through independent living, enabling them to stay in their own homes longer. Communities benefit as the local economy is supported through the purchase of goods from local businesses.
Weatherization

During fiscal year 2018-2019, SENCA provided Weatherization services and energy conservation education to:

48 adults in 39 households throughout the counties of: Cass, Johnson, Nemaha, Otoe, Pawnee, Richardson, and Sarpy.

The investment in these 39 homes has the potential of creating:

- approximately $6,786 reduction in annual utility costs with long-term direct energy savings of about $518,120 plus
- an additional $243,488 in non-energy related savings may also be realized over the long-term thereby producing both long-term and one-time benefits resulting in a 2 to 1 return on investment.

The goals of the Weatherization Program are to save energy, reduce heating and cooling costs and to ensure the health and safety of the households served. The average home experiences an average 18.7% reduction in heating costs. Additional savings are achieved in cooling costs. This conservation of energy reduces Nebraska’s dependence on imported energy and is a major contribution to the self-sufficiency of low-income persons allowing them to stretch their available income.

Weatherization also generates jobs and the purchase of materials within local communities adding to the overall local economy.

- Existing housing stock becomes more affordable by improving the health, safety, and energy efficiency issues of the home.
- Elderly and/or disabled individuals are able to remain in their home for a longer period of time postponing their need for assisted living and/or nursing home care.
- Energy efficiency and conservation decreases the drain on the nation’s energy resources and the budgets of those living on a fixed income. Lower utility bills result in increased household spending in communities.
- Weatherization contributes to utility companies experiencing a lower rate of accounts in default.

Success Story

"THE ASSISTANCE PROVIDED THROUGH SENCA HAS HELPED MAKE MY FINAL YEARS ENJOYABLE AS I CAN STOP WORRYING ABOUT HOW TO MAKE ENDS MEET."

"JOSH, GIN, AND CAROL HAVE SHOWN KINDNESS AND SUPPORT THAT HAS GIVEN ME HOPE."

When the HVAC repairman came to look at Linda’s furnace, the news of having to replace the entire unit wasn’t what this cancer survivor, who was once again battling brain tumors, wanted or needed to hear.

Linda had been struggling to keep up with high energy costs that came with living in the older Otoe County farm house that had been built in 1905. While the home had been updated prior to Linda purchasing it in 2014, there was little if any insulation in the attic, the doors were drafty, and both the furnace and air conditioner were in dire need of replacement.

Confronted with repair and replacement costs that she could not afford, the HVAC repairman told Linda to contact SENCA and ask about their Weatherization program.

Weatherization is designed to help qualifying households, up to 200% of poverty, with energy related repairs and even the replacement of a furnace if needed. Linda wasted no time in contacting SENCA and completing the weatherization application.

Housing Director, Gin Christiansen approved Linda’s application for Weatherization assistance which met established priority guidelines. Linda was over 60 years of age; disabled and undergoing a reoccurring bout with brain tumors while in her 5th round of radiation; she was struggling with high energy burden; and now, unfortunately, was dealing with a furnace that quit in the dead of winter.

While the main focus was to remove the old furnace and install a new, more energy efficient one, an inspection of the home, completed by one of SENCA’s trained and certified housing inspectors, confirmed the need for other the home more energy efficient.

Because of Linda’s on-going health issues, in addition to Weatherization assistance, she also qualified for Emergency Repair and Replacement (ERR) funds that would cover the costs of adding a new energy efficient central air unit to her home. Households who receive Weatherization will realize an average 18.7% reduction in energy related costs.

Even though Linda qualified for more than $13,000 of energy saving repairs and upgrades to her home, Josh Nincehelser, SENCA’s Energy Auditor/Quality Control Inspector, saw a need to refer Linda, and her life partner, to SENCA’s Family Outreach for additional help.

Following the initial meeting with Carol Aufenkamp, Otoe County Family Development Associate (FDA) the couple completed the required paper work and qualified for emergency funding to ensure their water was not shut off. The couple also utilized the SENCA food pantry to help meet their nutritional needs.

As a result of receiving emergency assistance, the couple was required to participate in six months of case management. The scheduled monthly meetings with FDA’s provide budgeting and money management skills to ensure families meet their self-sufficiency goals.
Family Outreach

Pam Armknecht
Community Services Director

- Emergency Assistance
- Family Services
- Health and Nutrition
- Education/Asset Development
- Job Skills
- RentWise Classes
- Adult Financial Education
- CASA - Court Appointed Special Advocate
Brittney was struggling to meet her family’s basic needs on what she received each month in disability, was newly separated, and was not yet receiving child support from her children’s father. She had just been served an eviction notice from her landlord and was in the process of trying to find a better, more affordable place to live for her and her children. Brittney was suffering from mental health issues and to compound her stress, both children were not doing well in school. Her children needed her, but Brittney didn’t have the mental or physical strength to deal with anything else. Brittney knew she needed help. Brittney grew up in the small southeast Nebraska community where she still lived. She had previously worked for a local law enforcement agency and her two children had previously attended preschool at SENCA Head Start. Being somewhat familiar with the variety of programs that SENCA provided families experiencing similar emergency situations, Brittney contacted the Richardson County Outreach Office and scheduled an appointment.

During her initial visit with one of SENCA’s trained Family Development Associate’s (FDA), Brittney was asked to provide basic household information including income verification. Brittney qualified for rental assistance to help with her first month’s rent. As a program requirement she began working one-on-one with the trained FDA to complete six months of case management. Brittney’s first assigned task was to identify her income, itemize her expenses, and create a budget that she could maintain. Once her budget was established, Brittney felt more organized and better prepared to handle her finances. Maintaining a monthly budget provided Brittney with the assurance she needed to successfully manage a household for her and her two children. While in case management Brittney was the recipient of an iPad that SENCA was giving away. The iPad has provided Brittney with the ability to organize her bills, life, and budget in an easy and efficient way, thereby reducing stress and increasing her self-confidence.

More than six months after exiting case management Brittney and her children are still benefitting from the budgeting and money management skills Brittney acquired from SENCA’s Family Development program. Brittney is staying on budget each month, meeting basic needs and paying her rent and utilities on time. There are still financial goals that Brittney wants to achieve, such as paying down previous debt and establishing a savings account for future wants and needs.

“Throughout this entire experience my mental health has never been better,” shares Brittney, who courageously took the first step in making a positive change in her life. In addition to achieving the peace of mind a feasible budget can provide, Brittney has also improved her organizational skills. She now has both the time and energy to help her ten year old son and twelve year old daughter with their home-work, and as a result, both children are doing much better in school.

“I WOULD DEFINITELY RECOMMEND SENCA PROGRAMS TO OTHERS.” COMMENTS A GRATFUL BRITTNEY.

“FAMILY OUTREACH PROVIDED MUCH NEEDED RELIEF AND SUPPORT TO OUR FAMILY DURING A DIFFICULT SITUATION. IN ADDITION, HEAD START WAS SUCH A NEAT EXPERIENCE FOR MY CHILDREN IN HELPING THEM PREPARE FOR KINDERGARTEN.”
Family Development
During the 2018-2019 SENCA fiscal year:

- **80%** of families with a goal of employment gained employment
- **100%** of employed families maintained employment for at least 90 days; of families with a goal of opening a savings account achieved their goal and increased their savings through deposits to their savings accounts; of families obtained safe and affordable housing.
- **100%** of individuals completing the program moved from homelessness to stable housing.
- **100%** of adults improved parenting and family functioning skills.
- $74,325 in debt paid down
- $26,098 contributed to their escrow accounts

Project First
Over the past six years:

- **100%** of individuals completing the program moved from homelessness to stable housing.
- **100%** of adults improved parenting and family functioning skills.

CASA
During the 2018-2019 fiscal year:

- **55%** of Nemaha, Otoe and Richardson county youth in the Juvenile Court System were served by 13 active Volunteer Advocates and 1 CASA staff member. The remaining 45% were monitored by the CASA Coordinator.
- The SENCA CASA (Court Appointed Special Advocate) program provides advocacy for youth who are introduced into the child welfare system through no fault of their own.
- CASA supports and promotes court-appointed volunteer advocacy so that every abused and neglected child can be safe, establish permanence, and have the opportunity to thrive.

Children with an appointed CASA volunteer spend an average of four fewer months in the foster system than children without a CASA volunteer thereby saving tax dollars. Abused and neglected children have a constant adult present in their lives while living in out-of-home care. CASA creates meaningful community volunteer opportunities. The estimated Return on Investment for this program is 15 to 1.

The Family Development program focuses on the reduction of poverty and the empowerment of low-income individuals and families to become self-sufficient through intensive case management services.

Families and individuals become self-sufficient and self-reliant through case management; obtain employment skills; keep current with rent and utilities; realize debt reduction; and have a stake in their communities making them better citizens.

The Project First program is a transitional homeless program. Enrolled clients participate in intensive case management and have access to supportive services.

The local economy is supported through payment of rent and utilities. Individuals increase wealth by opening a savings account. Families and individuals become self-sufficient, self-reliant tax paying citizens through case management services.
Youth Education

Angela K. Antholz
Deputy/Head Start Director

› Head Start
› Youth Mentoring
› SENCA SMART Financial Literacy
Success Story

“LEIGH IS A GREAT ASSET AND A DEDICATED ADVOCATE OF HEAD START” COMMENTS MEGAN, SENCA’S HEAD START TEACHER IN AUBURN. “I TAUGHT EACH OF LEIGH’S CHILDREN. IT’S REWARDING TO SEE THE POSITIVE IMPACT HEAD START HAS HAD ON LEIGH’S FAMILY AND LEIGH’S CAREER GOAL OF HELPING OTHER HEAD START FAMILIES BE SUCCESSFUL.”

“I’m the type of person that won’t give up” comments Leigh, a dedicated soul filled with love and support for her family and passionate about her work with children. Leigh is always determined to overcome and succeed, even when faced with some of life’s most difficult challenges.

This mother of six children, who range in age from 13, 11, 8, twin 7 year olds and a six year old, is not just a wife and mom, but a part-time SENCA Head Start team member. Leigh is working to achieve her Child Development Associate credential, while serving as care-giver to both of her parents.

A life-long resident of Nemaha County, Leigh came to SENCA for help when her family, consisting of herself, her husband and two small children, were evicted from their home and found themselves in a homeless situation. Leigh contacted the Nemaha County Outreach Office and made an appointment with the local Family Development Specialist (FDS). Upon completing the required paper work, and providing essential documentation, the family qualified to participate in Project FIRST. Project FIRST is an extensive case management program that provides homeless families up to 24 months of case management and financial assistance as they work toward a goal of self-sufficiency.

The Nemaha County FDS referred the young family to SENCA Head Start. Head Start is a comprehensive child development program that serves children ages 3 to 5 and their families with the overall goal of increasing school readiness of young children in low-income families.

Head Start involves the whole family through four cornerstones: child development, family partnerships, community partnerships, and staff development. Once the children were enrolled in Head Start, Leigh became actively involved as a parent, Policy Council Member, and advocate always sharing with others the benefits of the program.

Leigh’s family was living within a budget, meeting their basic needs, and the children were thriving in Head Start when a third child was welcomed into the family. With the help provided by SENCA’s life-changing programs, Leigh and her husband finally felt as if things were moving in a positive direction. Life was good. Then later that year tragedy struck with the unexpected death of Leigh’s husband, and father of their three young children. To compound this young widow’s unforeseen situation, Leigh discovered she was pregnant with twins. “I don’t know how we would have gotten through all that we did without the care and support provided by Megan and the wonderful Auburn Head Start team. They were with me and the children every step of the way” comments a sincere and grateful Leigh.

Throughout the next few years Leigh and her children experienced more changes, including happier times. Leigh remarried in 2014 and the family gained a husband, father, and the welcome addition of a sixth child. Leigh remained invested in Head Start with all six children completing the program and entering kindergarten ready to be successful.

When her youngest child was in his last year of Head Start, Leigh became employed with SENCA as a teacher aide. Because of her determination and strong belief in the program, she decided to make a career doing something she enjoys while giving back to others with the same support she received. Leigh shares “People don’t realize what Head Start families experience, each day is a different challenge. My focus is working with these families to help provide the support and services they need.”
Head Start

By the end of the 2018-2019 school year 95% of all the SENCA Head Start children were either meeting or exceeding age appropriate development.

Head Start is a comprehensive child development program for 3 to 5 year old low-income children and their families. Head Start involves the entire family through four cornerstones that include: Child Development; Family Partnerships; Community Partnerships; and Staff Development.

Head Start yields a long-term return on investment from its educational, economic, and social impacts on vulnerable children and families.

Head Start children enter public school ready to be successful. Parents gain parenting skills and experience which benefits their family and encourages them to become more productive citizens in their communities.

SENCA Head Start is located in Auburn, Falls City, Nebraska City Full-Day, Nebraska City Part-Day and Table Rock. In addition SENCA has three collaboration sites located within the Auburn, Falls City Public, and HTRS school systems.

Youth Mentoring

Youth Mentoring provides opportunities for area youth to become involved in their communities beginning with the Head Start program. Program success is measured through pre and post program surveys. Surveys are completed by the students and the guidance counselors.

Youth Mentoring improved their approach to learning, improved health and physical development, and 100% of participants performed at grade level.

Youth Mentoring provides opportunities for area youth to become involved in their communities beginning with the Head Start program. Program success is measured through pre and post program surveys. Surveys are completed by the students and the guidance counselors.

SENCA SMART

Since 2011 SENCA SMART (Strategic Money and Resource Techniques) has impacted:

3,336 8th and 12th grade students in the counties of: Cass, Johnson, Otoe, Pawnee and Richardson.

- 92% of 12th grade students increased skill and knowledge by 33 percentage points.
- 87% of 8th grade students increased skill and knowledge by 34 percentage points.

SENCA began this financial literacy program for 8th and 12th grade youth in 2011 as a result of needs identified in a regional survey. The program is available to all participating schools throughout SENCA’s six core county service area.

The program curriculum meets the Nebraska State Standards of Education and includes modules on credit, budgeting, checking and savings in addition to how education impacts earning power. Outcomes are determined by a pre and post test.

Based on public school education costs, this program provides a 5 to 1 return on investment.
Southeast Nebraska Community Action Partnership receives approximately 75% of its funding from competitive federal and state grants. The remaining funds are derived through private resources such as donations, local funders, and the agency annual benefit golf tournament.

As a steward of public funds, SENCA has established internal controls to help ensure financial systems are strong and all money is expended in an efficient and effective way.

SENCA is one of nine Community Action Agencies (CAA’s) in the state, and one of more than 1,100 CAA’s nationwide. The agency undergoes numerous audits and reviews, each year always striving to achieve excellence as well as client success.

SENCA Core Programs and Funding Amounts Total Agency Funding for Fiscal Year Ending September 30, 2019

$3,408,717

- Youth Education: 49%
- Community Economic Development: 21%
- Family Outreach: 22%
- Administration: 8%
The War on Poverty

SENCA has been working throughout southeast Nebraska communities for more than fifty-three years in an effort to reduce poverty, however the War on Poverty is something that we cannot fight alone. Alone we can’t, but together we can! Together we can work to provide solutions that will enable those facing economic insecurity an achievable path to self-sufficiency. Please join us as we continue to invest in our neighbors and the communities we call home. Here are five ways you can help: Donate, Volunteer, Shop, Share, and Get Involved.

1. DONATE - go to www.senca.org and click on the Donate button using a debit/credit card.
2. VOLUNTEER - your time, talents, or resources. Contact a SENCA location near you!
3. SHOP - sign-up for Amazon Smile (smile.amazon.com), select SENCA, it’s that easy.
4. SHARE SENCA’s information with others.
5. GET INVOLVED in your community, vote, and support specific causes, groups, or organizations you consider important.

The Promise of Community Action

Community Action changes peoples lives, embodies the spirit of hope, improves communities and makes America a better place to live.

We care about the entire community and we are dedicated to helping people help themselves and each other.
